SUMMARY

Data Analytics and Software Development enthusiast with hands-on experience in data analysis, statistical analysis, and building data-driven applications. Skilled in Python, SQL, Pandas, NumPy, and data visualization, with experience in exploratory data analysis, feature engineering, and developing web applications. Strong foundation in analytical problem-solving, Data Structures, DBMS, and Object-Oriented Programming.

EDUCATION

SRM Institute of Science and Technology <i>B.Tech in Computer Science and Engineering, CGPA: 8.61</i>	Delhi NCR 2023 – 2027
---	--------------------------

EXPERIENCE

Defence Research and Development Organisation (DRDO) <i>Intern</i>	Jun 2026 – Jul 2026 <i>India</i>
- Selected and analyzed a Kaggle dataset as part of an independent data analysis assignment during the internship. - Performed data preprocessing and exploratory data analysis using Python, Pandas, and NumPy to identify patterns and trends in the dataset. - Created data visualizations using Matplotlib and Seaborn to communicate analytical findings and derive meaningful insights.	
SR Engines India Pvt. Ltd. <i>Intern</i>	May 2026 – Jun 2026 <i>Remote</i>
- Assisted with documentation, reporting, and spreadsheet-based workflows during the internship. - Gained exposure to industrial service operations and business reporting processes at a Kirloskar Care Authorized KOEL Care Centre.	

PROJECTS

Customer Churn Analytics & Retention Intelligence <i>Python, Pandas, NumPy, SQL, Matplotlib, Seaborn</i>	GitHub
- Analyzed 7,043 telecom customers using Python, Pandas, and NumPy to measure churn, retention, revenue exposure, and customer behavior across contracts, tenure, services, and payment methods. - Performed data cleaning, exploratory data analysis, and feature engineering to identify key churn patterns and create customer segments based on tenure and customer value. - Used SQL to analyze churn, revenue, customer segments, and business questions across multiple customer dimensions. - Created visualizations using Matplotlib and Seaborn, identifying 42.7% churn among month-to-month customers and 64.0% churn among New + High Value customers as key retention insights.	
StudyNest – Student Productivity Platform <i>React, JavaScript, Flask, MySQL</i>	GitHub
- Built a full-stack student productivity platform using React, Flask, and MySQL to help students organize academic resources, manage tasks, and improve study habits. - Implemented a notes and file management system with user-specific upload, download, and organization of academic resources. - Built a task management system with task creation, deadlines, priorities, completion tracking, and productivity statistics. - Developed a Pomodoro-based focus timer and productivity dashboard to track completed tasks, focus sessions, and user progress.	

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, JavaScript
Data Science: NumPy, Pandas, Feature Engineering, EDA
AI & APIs: Prompt Engineering, API Integration
Databases: MySQL
Tools: Git, GitHub, VS Code, Jupyter Notebook
Data Visualization: Matplotlib, Seaborn, Excel, Power BI
Web Technologies: Flask, React.js, HTML, CSS
Competencies: Business Analytics, Data Visualization, Feature Engineering

CERTIFICATIONS

- Oracle Certified AI Foundations Associate - NPTEL – Natural Language Processing - Tata – GenAI Powered Data Analytics Job Simulation - EY & Microsoft – AI Skills Passport - Deloitte Australia – Cyber Job Simulation
